

It has come to my attention that FM radio may be changing which would affect my current FM radio station, Air 1. Air 1 serves my community and myself through offering a positive alternative to radio listening. It is radio that is uplifting and focused on helping and serving people. Air one provides my community with daily positive reminders to live a respectful life and to help others. Without this station I feel the community would be losing a great service. The public needs this station not only because it offers a positive listening experience, but because it leads and encourages many people in the Lord. This can only better my community and encourage people to respect each other and help others when needed. Thank you for your time and I do hope you take this into consideration before changing the current station.
